PROFESSIONAL SUMMARY

System Administrator with hands-on IT experience since 2021, currently running the IT environment of a multi-site manufacturer: Microsoft 365, Microsoft Entra ID and Intune (Conditional Access, MFA, device compliance), Active Directory, Windows Server and Linux, networking and firewalls, and a business-critical ERP on SQL Server. Promoted from IT Technician to System Administrator. Methodical troubleshooter who secures remote access with Cloudflare Zero Trust, runs tested backup and recovery, and automates routine work with PowerShell and Python. English C2 (EF SET 76/100), Arabic native, French intermediate.

CORE SKILLS

Systems & Virtualization: Windows Server, Windows 10/11, Linux, virtual machines and snapshots, SQL Server, Microsoft Dynamics NAV 2018 (ERP)

Identity & Microsoft 365: Active Directory, Microsoft Entra ID (Azure AD), Microsoft Intune (MDM), Conditional Access, MFA, Exchange Online, Teams, SharePoint, OneDrive, user onboarding/offboarding, licensing, security groups

Networking & Security: TCP/IP, VLANs, routing, switching, VPN, firewall management, Cloudflare Zero Trust (Cloudflare One), secure tunnels, structured cabling (RJ45)

IT Operations: Troubleshooting, incident and request management (GLPI, ITIL-aligned), IT asset management, backup and disaster recovery, restore testing, monitoring and log analysis

Automation & Scripting: PowerShell, Python, automated reporting and alerting, AI tooling (Ollama)

Development: Next.js, React, JavaScript, PostgreSQL, REST APIs, OData, HTML/CSS

Hardware: Desktop and laptop repair and assembly, component replacement, data recovery, CCTV installation

PROFESSIONAL EXPERIENCE

System Administrator – Best Beton | Jbel Ouest, Tunisia | 09/2026 – Present

- Administer servers, network services and business applications for a multi-site precast-concrete manufacturer, including the Microsoft Dynamics NAV 2018 virtual machine and its SQL Server database.
- Publish internal applications and NAV OData web services through Cloudflare Zero Trust tunnels, with no inbound firewall ports opened.
- Run backup and disaster recovery: scheduled VM snapshots, database backups, offsite replication and regular restore tests.
- Administer Microsoft 365 (Exchange Online, Teams, SharePoint, OneDrive): user onboarding/offboarding, licensing and security groups.
- Manage Microsoft Intune enrolment, compliance policies and MDM; enforce Conditional Access and MFA in Microsoft Entra ID.
- Run GLPI for incident and request tickets, IT asset tracking, user management and workflow automation.
- Automate reporting, notifications, monitoring and log analysis with Python and AI tooling (Ollama); build internal dashboards and production applications.

IT Technician – Best Beton | Jbel Ouest, Tunisia | 09/2025 – 09/2026

- Diagnosed and resolved hardware, software and network issues for end users across several sites; provided on-site and remote support for desktops, laptops and mobile devices.
- Installed, updated and configured Windows and Linux systems.
- Deployed and supported ERP clients (Microsoft Dynamics NAV / Navision) and engineering software (Revit, Tekla, SolidWorks).
- Built a full-stack internal HR web application (Next.js, React, PostgreSQL) for employee management.

IT Support Technician – Teriak | Jbel Ouest, Tunisia | 07/2024

- Resolved hardware, software and network issues for end users; installed and updated Windows and Linux.
- Administered user accounts in Active Directory.

Computer Support Technician – TIBH | Hammamet, Tunisia | 10/2021 – 03/2022

- Repaired and configured customer devices: component replacement, data recovery and backups, operating system, driver and antivirus installation.
- Installed and cabled network infrastructure, including RJ45 patch panels and outlets.

IT Support Intern – Autoliv | El Fahs, Tunisia | 12/2020 – 01/2021

- Monitored and maintained computer systems and industrial networks; resolved hardware and software failures.

CERTIFICATIONS
